SUMMARY

Computer Engineering undergraduate with strong CS fundamentals and backend development, Experienced in building scalable web applications and REST APIs using JavaScript, Python, and Node.js, with hands-on experience in databases, authentication, and MVC architecture.

EDUCATION

All India Shree Shivaji Memorial Society IOIT Pune, Maharashtra
Bachelor of Technology in computer engineering current SGPA : 8.5 Aug. 2025 - Jul. 2028

Government Polytechnic Ahmednagar Ahmednagar, Maharashtra
Diploma in Computer Engineering (92.17%) Aug. 2022 – May 2025

EXPERIENCE

RB-tech Services Jun. 2024 – Jul. 2024
Ahmednagar, Maharashtra

- Worked on full-stack web application built using a traditional monolithic architecture.
- Developed a project using PHP for robust server-side routing, business logic, and secure database management, while utilizing HTML5, CSS3, and JavaScript
- Enabled transparent fund management and efficient financial monitoring

PROJECTS

Atithi – Full-Stack Travel Listing Platform | GitHub | Demo Jun. 2025 – Sep. 2025
Technologies: Node.js, Express, MongoDB, Passport.js, Cloudinary, Geoapify API

- Built a full-stack listing platform with Node.js, Express, and MongoDB featuring CRUD operations, geospatial (2dsphere) queries, and Passport-based auth with Google OAuth.
- Integrated Geoapify APIs for interactive map-based location selection, reverse geocoding, and a proximity-ranked "Nearby Places" recommendation feature.
- Implemented Cloudinary-backed image uploads and a region-based "Explore by State" discovery feature using dynamic aggregation queries.

AI-Powered Interview Readiness Assessment Platform | GitHub | Demo Feb. 2026 – Present
Technologies: Python, FastAPI, OpenAI Whisper, Librosa, MediaPipe, Groq API

- Built an AI mock-interview system transcribing candidate audio with Whisper and scoring answers via the Groq LLM API, with a rule-based fallback for reliability.
- Developed a Librosa-based tone-analysis pipeline (pitch, energy, speech rate) and a MediaPipe/OpenCV module for eye-contact and posture detection.
- Designed a candidate-specific question generator and consolidated performance report combining audio, tone, and video-derived scores.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Backend: Node.js, Express.js, FastAPI, REST APIs, OAuth

AI/ML: LLMs, RAG, AI Agents, Tool Calling, LangChain, Embeddings

Databases: MySQL, MongoDB, Oracle

Tools: Git, GitHub, Swagger

LEADERSHIP & PARTICIPATION

Sports Secretary: Computer Engineering Students Association — Coordinated and Managed sports events and activities for the student community

InnovateYou Techathon 3.0 National-Level Hackathon Recognition : Team received an opportunity to launch our student-focused application for college students

AWS Cloud Learning Badges: Completed ten AWS Cloud Fundamentals learning badges
